

Sonos - Play any song. In any room. From anywhere.

Sonos is the first wireless, multi-room digital music system that lets you play all your digital music, all over your house—and control it all from the palm of your hand. With a wireless Sonos™ Controller in hand, you'll have instant access to all your digital music, plus Internet radio, subscriptions to online audio services like Rhapsody® and Audible.com®, and even music from your favorite CD or MP3 player.

And, with Sonos™ ZonePlayers in the rooms of your choice, you can play the same song in different rooms, or different songs in different rooms. To start listening, just grab the full-color Controller and simply pick a room, pick a song and hit play.

With a Sonos Digital Music System you can:

- Liberate the digital music that's stored on your PC, Mac or Network Attached Storage box.
- Control all your music and all your rooms from the palm of your hand with a full-color LCD screen and scroll wheel.
- Wirelessly stream all your music and Internet radio, all over your house—in up to 32 rooms.
- Play the same song in different rooms or different songs in different rooms. Simultaneously.

Wireless, handheld control.

With the Sonos Controller you can instantly access your entire music collection, plus Internet radio, from the comfort of your living room couch or dining room chair. No more running to your PC to turn on, change or turn off your music. No need for pointing or line of sight. Use one Controller for your entire house or several for added convenience.

Wireless, multi-room music.

With Sonos you can wirelessly stream your digital music to any room in your house. Just connect ZP80s to your home theater, stereo or any other amplified audio device and ZP100s and speakers everywhere else you want music. Now you'll have a multi-room digital music system that delivers superior audio all through the house—from the bedroom to the terrace.

A perfect pair.

When we set out to create speakers for the Sonos Digital Music System we had three things in mind—acoustics, aesthetics and size.

The Sonos Loudspeaker delivers on all three. These high-performance bookshelf speakers provide great sound in a small space and they sure look great doing it.
