

E3 Connect Vodafone Spain Blackberry® Service

The Blackberry service is a 'push email' service which enables you to receive your emails in real time via a Blackberry activated handset. With the E3 Connect service via Vodafone Spain you have a choice of Blackberry handsets to buy and can use the service within Spain or abroad. All you need is a GPRS connection in Spain and roaming activation for the country you are travelling to.

With a Vodafone Spain Blackberry you can have an unlimited mailbox and many other functions.

- You can have up to 10 email accounts (POP3, IMAP4, webmail, if you are a Hotmail user, this is Hotmail Premium only) and you can read attachments such as Excel, Word, Powerpoint and PDF files.
- You can synchronise your email to a desktop PC to ensure you keep track of emails sent from your Blackberry.
- You can also synchronise your contacts, diary and task list.
- There is also a chat facility with users of GoogleTalk® or Yahoo Messenger®.
- You can divert, edit or delete email accounts and change the sender details.
- In addition, you can manage all these functions from your PC.

	NATIONAL	ROAMING	Network
<u>Option 1:</u> National Tariff	30€/month Unlimited Email + Internet navigation, within Spain *	10€/day <u>Email only</u> *	Vodafone partner
<u>Option 2:</u> Roaming Tariff	80€/month Unlimited Email + Internet navigation, within Spain *	Unlimited usage <u>Email only</u> *, included	Vodafone partner, however all networks compatible

* Rates above apply to usage on Blackberry terminal only. They do NOT apply if your Blackberry is used as a Modem connected to a PC.

If Internet Navigation is required when Roaming, using the terminal as a Modem, we would recommend applying an additional tariff not stated above - please request further details.

- Blackberry handset: Prices vary depending on model.
